## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 5/06, 1/07 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 4, 11 & 15 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Claim 1 has the mol % of a, b, c, and d and should recite the range of materials in the composition. Claim 4 should recite the field for the saturation magnetization note page 14. Claims 11 and 15 include raw materials while the materials are limited to the compounds containing Mg, Fe, Ca, and the element X note page 15.

### ***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-2 and 4-17 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mano et al. Mano teaches a magnetic oxide having Ca and Mg ions with other atoms to control the magnetization of the material . The process for the production of the Mg-based ferrite is to control the gas

atmosphere of the sintering process. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the oxides of the materials in the process of preparation of a Mg-based ferrite that is useful as a developer carrier in an electrophotographic developer.
